

## DETAILS:

Name: Mukwende Libimba

Address: Makeni Villa 98/20

Website: <https://mukwende.vercel.app>

Nationality: Zambia

Phone: +260765992534

## PROFILE:

Highly motivated and self-taught junior Frontend Developer with a passion for Web Deveopment seeking an opportunity to contribute to a dynamic team. Eager to apply my skills and knowledge to create engaging and user-friendly web appliactions while continuing to learn and grow in a professional enviroment.

## SKILLS:

- Proficeint in HTML5, CSS3, and JavaScript.
- Strong understanding of React JS and its ecosystem.
- Experience with responsive design and mobile-first developement.
- Familiarity with version control systems such as Git.
- Solid understanding of web development principles and best practices.
- Ability to work efficiently in a team as well as independently.
- Excellent problem-solving and analytical skills.
- Strong attention to detail and ability to deliver high quality work.

## PROJECTS:

- Built an eccormecce store for a fictional company called Audophile, incorporating features such as adding to cart, deleting from cart, increamenting and decrementing item quantity as well as checking out and others.  
Link: <https://audphil.vercel.app>  
Code: <https://github.com/mukwende2000/audiophile>
- Developed a static site for a fictional company called Kaffen which specializes in Coffe serving. Also added basic form validation using the react hook form library.  
Link: <https://kaffen.vercel.app>  
Code: <https://github.com/mukwende2000/kaffen>
- Created a job board site where people can search for jobs and employers can post their own jobs to find suitable candidates.  
Link: <https://jobspace.vercel.app>  
Code: <https://github.com/mukwende2000/jobspace>

## UNPAID EXPERIENCE:

Although I do not have professional work experience, I have been actively involved in self-initiated projects, where I have applied my frontend development skills and gained hands-on experience in building web applications using React JS. These projects have allowed me to refine my problem-solving abilities, work collaboratively, and strengthen my undestanding of software development methodologies.
